The Irwin Uran Gift Fund

The Loudoun County Public Library Board of Trustees accepted a gift of $25,000 from benefactor Irwin Uran in December 2001. It is the hope of Mr. Uran that the gift, earmarked for materials (books, videos, books on tape, etc.) that enrich people's lives, will encourage others to donate to the Loudoun County Public Library. Recipient of Irwin Uran's $1 million dollar bequest in 1999, the Loudoun County Public Library has hosted writers, artists, exhibits, documentary film series and concerts. Programs featured Pulitzer Prize-winning novelist William Styron and award-winning poet Carolyn Forche as well as noted author Rabbi Harold S. Kushner and Nobel Peace Prize winner Elie Wiesel. Over 2000 Loudoun County students and volunteers participated in Jeffrey Schrier's Holocaust Memorial sculpture in progress, Wings of Witness (brought to the county by the Loudoun County Public Library). Loudoun County audiences have attended library-sponsored Klezmer concerts including the recent standing-room-only concert featuring Hot Kugel. The bequest has provided over 3,000 new items to the library's collection.

Mr. Irwin's $25,000 bequest will enable The Loudoun County Public Library to purchase many new items for the library's collection including the 37 part video series LifeSmart and the American Sign Language (ASL Access) Video Collection. The LifeSmart series teaches young adults with developmental disabilities the essential skills for successful transition to adulthood. The series includes practical and specific social, work and living skills. The ASL Access Collection includes over 200 videos featuring poetry, comedy, stories, drama, debate, discussions and instruction for hearing parents and their deaf children, deaf adults and interested hearing persons. Deaf children and their parents, siblings and other family members can learn ASL from expert teachers in the comfort of their homes. The ASL video series will increase communication between parents and deaf children, promote literacy and advance educational achievement. Library Director Douglas A. Henderson says, "We are grateful for this gift that will benefit all members of the Loudoun community."

American Sign Language (ASL) is a unique and complete language. Deaf and hearing people use ASL for everyday communication, access to information, education, and artistic expression. And now ASL is coming to public libraries!

ASL Access partners with interested public libraries – with your help – to put ASL videos on the shelves.

ASL Access has created a collection of more than 200 ASL videos. Qualified deaf and hearing volunteer reviewers helped choose the videos. ASL Access places the collections in selected public libraries.

ASL Instruction Videos
The large majority of deaf children have hearing parents. ASL Access Video Collections serve these families, as well as countless other learners of ASL, with dozens of teaching videos.

Deaf History Videos
Videos trace the history and describe traditions of the Deaf Community.

ASL Literature Videos
ASL poets paint the air. Storytellers entertain. Classic literature comes alive in ASL.

Informational Videos in ASL
With public libraries as a point of connection, deaf people all across America meet in virtual visits, using ASL to talk together like neighbors over a fence. Children swap funny stories. Deaf parents offer advice. Deaf Ph.D.'s debate. ASL signers offer a hand up to those who learn best with ASL. Information becomes accessible through ASL.

You can make a difference!

People Are Talking About ASL Access

“I would like to express my support for this project. Being deaf myself, and involved in deaf education for over 25 years, I know well the great need to get sign language into the hands (so to speak) of deaf children and their parents as early as possible in the child's life. Early exposure, to the only language that a deaf person has full access to, is crucial for that person's educational, personal, and social development. And from a quarter century as a professional librarian, I know how well-suited public libraries are as community resources for this type of outreach, being located in all types of communities, large and small, urban and rural, serving all types of people . . .”

- Thomas Harrington, Reference & Instruction Librarian, Gallaudet University Library, Washington, DC

“Parents realize the importance of early language development. When (they decide) to provide visual communication to their young children they soon discover that sign language classes alone are not enough ... Project ASL Access will allow people to go to the library and help themselves to ASL videos, finding a rich repository of visual communication resources . . .”

-Sandy Harvey, Former Executive Director, American Society for Deaf Children

“I am a ‘book’ person, but above all I am a ‘language’ person, and language must be presented in a form which is complete and accessible - in the case of American Sign Language, this is video. ASL is not only the birthright of every person born deaf, but a beautiful and precious resource for us all. Anything that preserves and disseminates a powerful and expressive language such as ASL is a worthy project, and one we should all applaud.”

-Oliver Sacks, M.D., Author of “Seeing Voices”

“ASL Access’ campaign to donate ASL videotape collections to libraries across the United States is a significant humanitarian effort. Sensitivity and awareness from the general public of issues, needs, and cultural norms of the nation's deaf community will be greatly enhanced. Employment, education, and integration into the general mainstream will emerge more as meaningful and gainful factors for the deaf citizen’s opportunities to enjoy life, liberty and the pursuit of happiness. We congratulate ASL Access for its vision and commitment for this important project.”

-Claude L. Stout, Executive Director, Telecommunications for the Deaf, Inc. (TDI)

“It is a well known fact that the majority of deaf and hard of hearing children are born to hearing parents, and that many of these families also reside in small communities with limited exposure to American Sign Language (ASL) deaf and hard of hearing adult role models. Therefore, distribution of ASL-based videotapes and related materials through our nation's public library system is a wonderful way to ‘get the word out’ to the public.”

-Elizabeth Pollard, President, National Association of the Deaf
How To Communicate

by Christine Wixtrom

The Deaf American, Fall 1988

©1988 Reprinted with permission.

1. ESTABLISH POSITIVE COMMUNICATION GOALS:
   ♦ I want to “hear” and “see” you - to UNDERSTAND WHAT YOU SAY.
   ♦ I want to SHARE MYSELF - my ideas and feelings - WITH YOU.
   ♦ I want to GIVE AND RECEIVE CLEAR MESSAGES.
   ♦ I want to ENJOY TALKING WITH YOU AS A UNIQUE INDIVIDUAL.

2. RESIST THE TEMPTATION TO USE YOUR STYLE OF “COMMUNICATION” AS A SHIELD, A SWORD, OR A BANNER:
   ♦ Don’t talk without taking time to listen.
   ♦ Don’t use “communication” to dominate and manipulate others, forcing them to use the method of communication, language, grammar or vocabulary choices that you prefer.
   ♦ Don’t try to promote your preferred method of communication as The One True Way.
     (Instead, do demonstrate flexibility and tolerance by allowing each person to express and receive communication as he or she prefers.)

3. SHOW CREATIVITY:
   ♦ If your first attempt to communicate fails, try another way!

MATERIALS REQUIRED FOR SUCCESSFUL SIGN LANGUAGE COMMUNICATION

1. WILLING HANDS
   You can do it! The main requirement is willingness, not manual dexterity, perfect hands or talent.

   People who face all kinds of barriers have learned to sign, including those with arthritis, cerebral palsy, missing fingers, big or small hands. Just remember that it may take some time for you to learn to feel comfortable using hands, face, and body to talk.

2. AN EYE FOR UNDERSTANDING
   If you demonstrate a positive attitude, you will have success. An attitude of respectful interest is far more important than fluency.

   Most of us are not used to depending on our eyes to capture fleeting information. But “reading” sign language is a skill, like any other, that can be practiced and learned. Rather than striving to see every sign, relax and just try to get a general idea of what is being said. Don’t be afraid to ask for clarification.

3. AN OPEN MIND
   Most importantly, keep an open mind about communication strategies. There are many ways to communicate. It doesn’t much matter HOW communication happens. Do whatever you can to “make it happen!”
What Is Sign Language?

by Christine Wixtrom

The Deaf American, Summer 1988 (Updated July 1998)

That's a good question! There are many types of gestural communication, and sometimes the term "sign language" just doesn't make it clear which form is being discussed. Here are a few brief explanations to help clear up the confusion.

FINGERSPELLING, OR THE MANUAL ALPHABET

Fingerspelling is a method of representing the letters of the alphabet with the hand. Forming different shapes with your hand, you can spell out words such as: “H-O-W  A-R-E  Y-O-U?” Manual alphabets are not languages; they are visual codes for languages. The one-handed American Manual Alphabet is a code for English. (A two-handed manual alphabet is used in Europe.) There are different manual alphabets used to code different languages.

AMERICAN SIGN LANGUAGE OR ASL

ASL is a visual-gestural language. ASL developed in a natural manner, as a means of clear visual communication used among deaf people. ASL was created by deaf people and belongs to their culture, Deaf Culture. Today, ASL is used by millions of Americans and Canadians of all ages. The units of ASL are composed of specific movements of the hands and arms, eyes, face, head and body posture. These movements, or gestures, represent concepts and serve as the "words" of the language. Precise syntactical rules and grammatical principles dictate proper ASL "word" (sign) order, tense indicators, intonation and other aspects of ASL language use. The grammar of ASL is completely different from (and unrelated to) the grammar of the English language. Linguistic research has shown, however, that ASL is as "rich" and "complete" as any spoken language.

MANUALLY CODED ENGLISH

(MCE may also be termed SSS, Sign Supported Speech, or SSE, Sign Supported English)

There are a number of signing systems that were artificially devised in order to teach English to deaf children. MCE systems use manual signs to represent English visually. Signs used in these systems may be taken from ASL, but these vocabulary units are used to represent English words (rather than to represent concepts, as they do in ASL). Some new signs are contrived (invented) for English words or word parts in these systems. All signs are used in English grammatical order. Thus, these forms of manual communication are not languages - they are systems. Using one of these manual systems along with spoken English is a method of communication called "simultaneous communication" (or "sim-com"). Some MCE systems: Seeing Essential English (SEE1), Signing Exact English (SEE2), Linguistics of Visual English (LOVE) and Signed English (Bornstein, et al.).

PIDGIN SIGN ENGLISH (PSE, or CONTACT SIGN)

When some ASL signs, some newer signs, some contrived signs and fingerspelling are used in flexible grammatical order, this is referred to as Pidgin Sign English. (Recent research has determined that "contact sign" is a more accurate term.) PSE is not a structured system, but a natural mix of two languages, ASL and English. One of the varieties within this category is Conceptually Accurate Signed English (CASE). Users of CASE will choose a sign on the basis of its meaning in ASL, rather than on the basis of its sound or spelling in English. The signs are used in English grammatical order, and may be accompanied by English mouth movements. (Note: Persons transferring someone else's spoken language into an English-like signed format are said to be transliterating. This is in contrast to the conveyance of a spoken English message into its equivalent in the language of ASL - or an ASL message into English - which is called interpreting.)

PANTOMIME

Pantomime is not "sign language." Pantomime is not a language at all. Pantomime includes motions, gestures and dramatics used to communicate. It is used in theatre, and between people who do not share a common language.
